

New addition to the IR Swift family

The new Swift TX transmitter is an exciting advance in classroom soundfield. Designed by Connevens with teachers in mind, the Swift TX has been developed to have outstanding technical performance and also to be the smallest and lightest transmitter of its kind!

Natural, high quality sound is vital in a classroom to ensure the best listening and learning environment for students. The Connevens Swift TX has the widest frequency response of any IR soundfield transmitter available in the UK, meaning it gives the most natural sound.

The all new Swift TX transmitter looks appealing and is as light and comfortable to wear as a necklace.

Stylish looks with technical excellence!

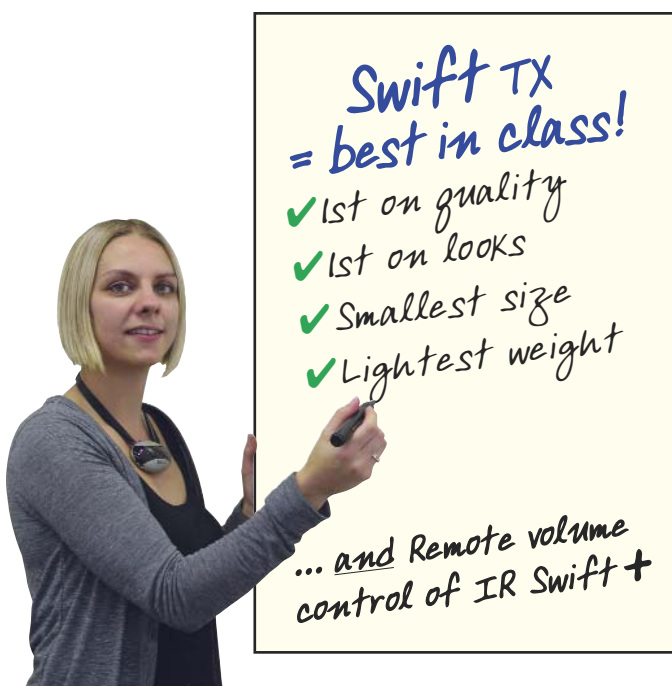

- Simple, attractive design
- Light, comfortable and easy to wear
at just 79g including battery
- Digital audio transmission
- Vocal clarity enhancer
- Very wide audio frequency response of 120Hz to 10kHz
- Superb natural sound quality with dual directional microphones

Shown lifesize

Unrivalled technical quality

The fantastic audio bandwidth, specially designed feedback reduction circuit and vocal clarity enhancer all combine to make the Swift TX 'top of the class' for technological performance. The specially optimised dual directional microphone array gives optimum voice pickup and helps reduce unwanted noise (see rear for more details) and we have also built in a male voice 'boom' reduction – all to ensure a consistent level of sound.

IR SWIFT +

IR Swift+ wall mounted receiver/amplifier

UK EXCLUSIVE

Remote volume control of IR Swift+ units

When used with an IR Swift + receiver amplifier you can remotely adjust your soundfield volume using the +/- buttons on the Swift TX – a really useful facility if the class is more boisterous than usual!

Swift TX – Connevens Classroom Soundfield

- Status indicator:**
- Green = on
 - ● Alternating red/green = recharge soon
 - Red = charging
 - Orange = charged

Technical

- Size: 95 x 49 x 26mm
 Weight: 79g inc. battery
 Power: 1 x 2700mAh NiMH rechargeable battery
- Typical operating time after a full charge: 11-14 hrs
 - Intelligent battery charging system with multi colour status indicator
 - Very wide audio frequency response of 120Hz to 10kHz with vocal clarity enhancer
 - Dynamic range >85dB when used in conjunction with IR Swift and IR Classmate receivers
 - Automatic sound level detection and auto power switch-off after 10 mins of low sound level

New IR Swift soundfield package prices:

Packages include: 1 x mains powered IR Swift receiver/amplifier, 1 x Swift TX transmitter microphone, battery, charger & 3.5mm aux i/p lead.

	IR Swift 45SWKF	IR Swift + 45SWPKF
Part no.	45SWKF	45SWPKF
1-9 systems	£ 841.00	£ 916.00
10+ systems	£ 756.90	£ 824.40
Cost of Installation	£ Nil	£ Nil

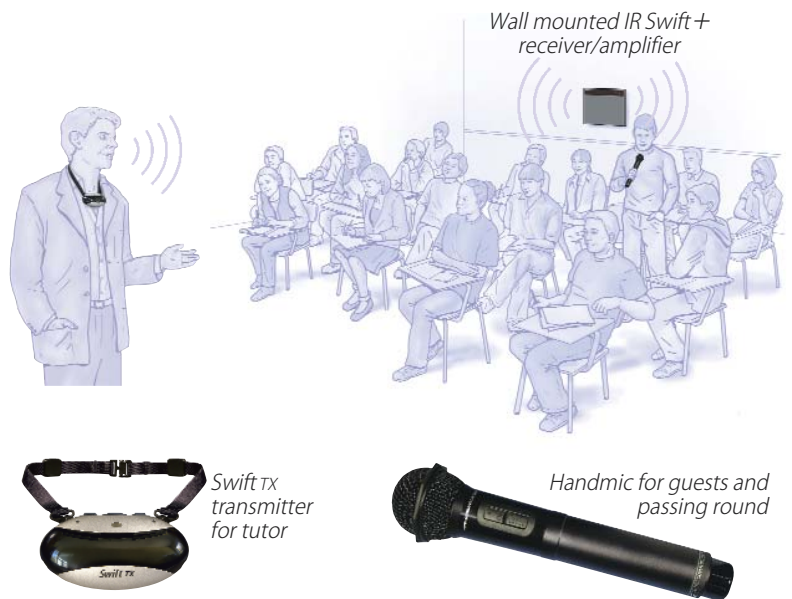

As long as you have someone with DIY skills who can fix two screws in the wall.

Swift TX transmitter

	Swift TX 45IRTXPE2	Charger 45IRTXCHG2

Swift TX transmitter for tutor

Handmic for guests and passing round

Optimised dual directional microphones

The Swift TX uses two separated microphones to provide a constant transmitted voice level as the user's head is turned from side to side.

The optimised dual microphone design provides ideal pick up of the user's voice and rejects unwanted sounds in all other directions.

This means that you don't get a variation of volume as the speaker moves their head from side to side.

SwiftTX audio input

3.5mm connection socket as standard to allow use with external sources eg. laptops, iPods etc.
Great for adding music to your classroom.

Small, neat and light, the Swift TX transmitter will not get in the way of your teaching at all! In fact, it's so comfortable you'll probably forget you're wearing it!
