Solutions to improve the quality of life

# DRY-BRIK® II

Introducing Dry-Brik® II

June 2007

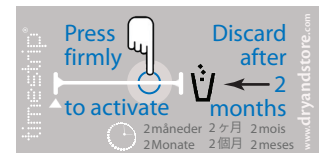

If you have ordered Dry-Briks previously, you will notice that these Dry-Briks look a bit different. That's because Ear Technology Corp is now shipping the revolutionary **Dry-Brik II**.

In development for over two years, this new desiccant product contains a more aggressive sorbent with much greater moisture-adsorbing capacity, packaged in an attractive, molded, disposable container. Dry-Brik II is compatible with all Dry & Store models.

Dry-Brik II features a novel timer called Timestrip®. Once activated by the user, a thin red line lengthens each day, and when the timer window is completely red (2 months), the depleted Dry-Brik should be replaced with a newly-activated one. The Timestrip has been custom-designed for the temperature range of the Dry & Store product line, making color-changing cards and crystals unnecessary.

The launch of the Dry-Brik II also brings with it new consumer-friendly packaging, also a custom design for this exciting new product. Since the manufacturer guarantees a two-month life expectancy for each Dry-Brik II, each 3-pack represents six months of protection.

**Complete Instructions for Use are provided inside each 3 pack, including the following translations: English, Spanish, French, Dutch, German, Japanese, Chinese.**

**Ear Technology Corporation**  
Helping people hear better, every day.<sup>sm</sup>
