Solutions to improve the quality of life

Connevens offer a wide range of clocks suitable for use by deaf and hard of hearing people, each with their own attributes. It is worth remembering that vibrating alarm clocks are also very useful if one person in a household needs to be woken at a different time to the rest of the family!

As with all our products, we have carefully evaluated our range of clocks and if the description of vibration or volume on one clock is the same as another clock, eg 'good vibration', then in our view they are the same.

Some features shown below are dependent on purchasing additional accessories.

For features and prices of all clocks, please see comparison chart on pages 156-157.

Comparative loudness

While manufacturers often give figures in decibels for the alarm volume levels of the clocks, we don't quote these as there is no guarantee of consistency of measurement across manufacturers. Instead we have our own system of 'blobs' which give an indication of the maximum volume level in a comparative manner.

Blob ratings

(approximate dB equivalent @ 1m distance)

- 60 dB and above
- 70 dB and above
- 80 dB and above
- 90 dB and above

40CLSB200

The **Sonic Boom SB200** is the **most popular** clock in our range. It is an easy to use, compact clock with vibrating pad. The clock does not take up much bedside table space and is mains powered. It has **very good vibration** and **loud sound** with easily adjustable tone and volume. *The SB200 is our recommended choice for those who want a compact but clear alarm clock which is easy to use. A good all-rounder.*

The **Sonic Boom SBA475 analogue** alarm clock with vibrating pad is an attractive and easy to use clock, ideal for those who prefer a large conventional clock face with analogue hands. The design of this clock is 'classic' but modern. It has a **very good vibration** and **loud sound**. This clock also has a nice optional bright blue backlit display, with a high/low dimmer switch. Pushing the 'Snooze' button also illuminates the display, which can flash when the alarm goes off as a visual alarm indicator. *This clock is particularly simple to set, has a large easy to read clock face and an attractive optional bright blue backlight.*

40CLSBA475

40CLSBD375

The **Sonic Boom SBD375 dual alarm** is an attractive clock with vibrating pad and **large display**, easy to use dual alarm feature. The dual alarm capability of this clock is great for those who want multiple alarms. This is a large clock with a very easy to read display. It has **very good vibration** and **loud sound** with easily adjustable tone and volume. *This clock is ideal for those with poor vision who want large, easy to read numbers and a simple to operate alarm clock.*

Designed especially for young ladies (!), the **Sonic Boom SBH400 Pink Sweetheart** alarm with vibrating pad is a fantastic hot pink colour, with an **attractive heart shape** and **multi coloured display**. This clock may look cute but even Sleeping Beauty wouldn't manage to sleep through it's powerful alarm and vibration! It has **very good vibration** and **loud sound** with easily adjustable tone and volume. The multi-coloured display is easy to read and gives this clock a sense of fun. The bright display can be dimmed for night-time use. It is easy to set as all the controls are on the front of the clock. *This attractive clock puts the fun back into mornings! It may look cute, but this clock packs a punch – ideal for girls of all ages.*

40CLSBH400

The **Sonic Bomb SBB500** alarm clock with vibrator pad is striking and masculine, this fun clock is **designed for guys of all ages!** The Sonic Bomb has a 'stealth' masculine colour scheme with a with a clear red digital display, which can be dimmed for night-time use. It has a **very good vibration** and **loud sound**, with easily adjustable tone and volume. *This clock is fun and one of the most popular in our range – sure to get even the sleepest teenager out of bed!*

40CLSBB500

40CLSBS550

The **Sonic Bomb SBS550BC** digital alarm clock has a Skull snooze alarm killer, complete with **piercing red eyes** and a **'bone crusher' vibrator** pad!

You might want to sleep with one eye open as this terrifying clock promises to "Wake the Dead"! It has a **very good vibration** and **loud sound**, with easily adjustable tone and volume.

And if that wasn't enough, this Skull comes with a 3.5mm audio input, allowing you to **connect in your own MP3 or CD payer** and listen to your own music through your alarm clock – cool!

This clock is a clock with attitude – you will either love it or hate it! Behind the eye-catching design, the Skull's volume and vibration strength is the same as the rest of the Sonic Alert range. New for this catalogue and sure to be popular.

The large display **Wake 'n' Shake Alarm** digital alarm clock can wake you with sound, strobe light or a vibrating pad – or noise & flash or noise & vibrate. It has a **very good vibration** and **very loud sound** and can also alert you to the telephone. The clock has a particularly **large digital display** with numbers approx. 50mm tall. There is also an integral strobe which can be set to flash for a visual alert. *The Wake 'n' Shake is a good clock for those who want large, easy to read numbers and the more advanced feature options such as a strobe and telephone alert. A model popular with Social Services.*

40CLWAKEG

40CLTCL200

The **Amplicomms TCL 190 & TCL 200** alarm clocks can wake you with sound, flashing light or a **wireless vibrating pad**. They have a **good vibration** and **very loud sound** and can also alert you to the telephone.

The **TCL 190** has an analogue face for those who prefer a traditional design. The **TCL 200** has a digital face with **large numbers**. It also has a nice dual alarm feature, with the option to set alerts to activate Mon-Fri, Mon-Sun or Sat & Sun only. There is also a **'talking' voice** output for the clock time and alarm time.

A unique feature of the Amplicomms clocks is their vibrating pad, which is wireless. It has rubber non-slip patches to prevent the vibrator moving around under the pillow and it's internal battery can be charged up by plugging it into the clock with the supplied charging cable.

The chunkiness of the controls for these clocks make them good for people who find buttons fiddly. The wireless vibrating pad will particularly suit some users. The TCL 200 has some nice unique features such as the alarm patterns and 'talking' clock output.

40CLTCL190

40CLSBP100

The **Sonic Shaker vibrating travel alarm clock** is a particularly attractive **vibrating travel alarm clock with good vibration**. The clock is **very easy to set** and use; with vibrate only, beep only or vibrate with beep modes. It is supplied with a clip and lead to allow you to secure it in/under your pillow while in use and a smart fabric protective travel pouch for easy packing. When the display is closed, this clock has a **slimline profile** so you hardly notice it when it's under your pillow.

*In our view this is a true travel clock with the strongest vibration and nicest design. It would be our recommended choice and is **our most popular travel clock**.*

(The AAA battery powers the clock and lasts quite a long time. The AA batteries power the vibrator and need to be replaced more often).

The **travelTim** is an alarm clock capable of waking a deaf person or someone suffering from hearing loss. The whole clock is placed under your pillow. This travel alarm clock has **reasonable vibration**. It is supplied with a clip and cord to allow you to secure it in/under your pillow. This clock also incorporates an optional **bright white LED** light that will also visually alert you that the alarm is sounding/vibrating and has a socket to allow you to plug in an external vibrator if required (40CLTFVIB – see below).

In the opinion of our evaluation panel, this travel alarm clock has reasonable vibration (although not as good as the Sonic Shaker) and an adequate volume.

The look is good for those with visual impairment as the buttons are clear and brightly coloured and the display is larger than average for a travel clock (19mm).

(The AAA battery powers the clock and lasts quite a long time.

The AA batteries power the vibrator and need to be replaced more often).

40CLTIM

40CLVC10

The **VC10 vibrating analogue alarm** is a battery powered clock with a conventional clock face and a battery powered vibrating pad to slip under the pillow.

The clock face illuminates at a press of the snooze button. The vibrating pad and buzzer both increase in frequency the longer the alarm is left on, however the buzzer is not loud.

This clock has **good vibration** and a clear analogue clock face and is easy to set. It is compact and battery powered making it ideal for those on the move.

This clock can be used with a PPS Personal Pager System – please see website for more details.

Time Flash analogue alarm clock has a **bright strobe** and the option of adding a vibrator.

The clock face illuminates for a few seconds at a press of the snooze button. The buzzer (and vibrator) both increase in frequency the longer the alarm is left on, however the buzzer is not loud.

A vibrator is not included with this clock but can be purchased separately.

40CLTFC

Vibrator for Time Flash (or VC10 & travelTim)

When added to the system, vibrator is not powered from the clock and requires 3 x AA alkaline batteries – supplied

40CLTFVIB Qty 1+ £ 14.00 each

Spare alkaline AA batteries

MBNAAX4 £ 1.30 per pack of 4
