## Vibrating alarm clocks

Connevens offer a wide range of clocks suitable for use by deaf and hard of hearing people, each with their own attributes. It is worth remembering that vibrating alarm clocks are also very useful if one person in a household needs to be woken at a different time to the rest of the family!

As with all our products, we have carefully evaluated our range of clocks and if the description of vibration or volume on one clock is the same as another clock, eg 'good vibration', then in our view they are the same.

*Some features shown below are dependent on purchasing additional accessories.*

*For features and prices of all clocks, please see comparison chart on pages 140-141.*

40CLSB200

The **Sonic Boom SB200** is the most popular clock in our range. It is an easy to use compact clock with vibrating pad. The clock does not take up much bedside table space and is mains powered. It has **very good vibration** and **loud sound** with easily adjustable tone and volume.

*The SB200 is our recommended choice for those who want a compact but clear alarm clock which is easy to use.*

The **Sonic Boom SBA475 analogue** alarm clock with vibrating pad is an attractive and easy to use clock, ideal for those who prefer a large conventional clock face with hands. The design of this clock is 'classic' but modern. It has a **very good vibration** and **loud sound**. This clock also has an optional bright blue backlit display, with a high/low dimmer switch. Pushing the 'Snooze' button also illuminates the display, which can flash when the alarm goes off as a visual alarm indicator.

*This clock is particularly simple to set, has a large easy to read clock face and an attractive optional bright blue backlight.*

40CLSBA475

40CLSBD375

The **Sonic Boom SBD375 dual alarm** is an attractive clock with vibrating pad and **large display**, easy to use dual alarm feature. The dual alarm capability of this clock is great for those who want multiple alarms. This is a large clock with a very easy to read display. It has **very good vibration** and **loud sound** with easily adjustable tone and volume.

*This clock is ideal for those who want large, easy to read numbers and a simple to operate alarm clock.*

Designed especially for young ladies (!), the **Sonic Boom SBH400 Pink Sweetheart** alarm with vibrating pad is a fantastic hot pink colour, with an **attractive heart shape and multi coloured display**. This clock may look cute but even Sleeping Beauty wouldn't manage to sleep through it's powerful alarm and vibration! It has **very good vibration** and **loud sound** with easily adjustable tone and volume.

The multi-coloured display is easy to read and gives this clock a sense of fun. The bright display can be dimmed for night-time use.

It is easy to set as all the controls are on the front of the clock.

*This attractive clock puts the fun back into mornings!*

40CLSBH400

The **Sonic Bomb SBB500** alarm clock with vibrator pad is striking and masculine, this fun clock is **designed for guys of all ages!** The Sonic Bomb has a 'stealth' colour scheme with a clear red digital display, which can be dimmed for night-time use. It has a **very good vibration** and **loud sound**, with easily adjustable tone and volume. *This clock is popular and fun, sure to get even the sleepest teenager out of bed!*

40CLSBB500

40CLSBP100

The **Sonic Shaker vibrating travel alarm clock** is a particularly attractive **vibrating travel alarm clock with good vibration**. The clock is **very easy to set** and use; with vibrate only, beep only or vibrate with beep modes. It is supplied with a clip and lead to allow you to secure it in/under your pillow while in use and a smart fabric protective travel pouch for easy packing. When the display is closed, this clock has a **slimline profile** so you hardly notice it when it's under your pillow. *In our view this is a true travel clock with the strongest vibration and nicest design.*

*(The AAA battery powers the clock and lasts quite a long time. The AA batteries power the vibrator and need to be replaced more often).*

40CLWAKEG

The large display **Wake 'n' Shake Alarm** digital alarm clock can wake you with sound, strobe light or a vibrating pad – or noise & flash or noise & vibrate. It has a **very good vibration** and **loud sound** and can also alert you to the telephone. The clock has a particularly **large digital display** with numbers approx. 50mm tall. There is also an integral strobe which can be set to flash for a visual alert. *The Wake 'n' Shake is a good clock for those who want large, easy to read numbers and the more advanced feature options such as a strobe and telephone alert.*

The **Vibralarm** is a stylish alarm clock with vibrator pad which will not be ignored – it has the **most powerful vibration** of any clock in our range and is **astoundingly loud**. A mains powered clock for those with hearing problems with a good range of features. The vibrating pad can be placed under either the bed sheet or mattress.

*The Vibralarm and Vibes vibrator kit is our recommended choice of alarm clock for those who want the maximum in sound level and vibration.*

*The vibrator can be either pulsed or constant.*

40CLVALK1

## Vibrating alarm clocks continued from page 139

The **Shake Awake** is an alarm clock capable of waking a deaf person or someone suffering from hearing loss. The whole clock is placed under your pillow. This travel alarm clock has **reasonable vibration**. It is supplied with a clip and cord to allow you to secure it in/under your pillow.

*The Shake Awake has been recently been redesigned. The new look is good for those with visual impairment as the buttons are clear to read, comparatively large and easy to use and the display is nice and large (19mm).*

*(The AAA battery powers the clock and lasts quite a long time. The AA batteries power the vibrator and need to be replaced more often).*

40CLSHAKE

40CLVC10

The **VC10 vibrating analogue alarm** is a battery powered clock with a conventional clock face but with the added benefit of a battery powered vibrating pad to slip under the pillow.

The clock face illuminates at a press of the snooze button. The vibrating pad and buzzer both increase in frequency the longer the alarm is left on, however the buzzer is not loud.

This clock has **good vibration** and a clear analogue clock face and is particularly easy to set. It is compact and battery powered making it ideal for those on the move.

*This clock can be used with a Nightingale baby alarm or PPS Personal Pager System – please see pages 145-146 and Section 7 respectively for more details.*

**Time Flash analogue alarm** clock has a **bright strobe** and the option of adding a vibrator. The clock face illuminates for a few seconds at a press of the snooze button. The buzzer (and vibrator) both increase in frequency the longer the alarm is left on, however the buzzer is not loud. This is a mains powered clock with a clear analogue clock face and is **particularly easy to set**.

A vibrator is not included with this clock but can be purchased separately.

40CLTFC

### Vibrator for Time Flash (or VC10)

When added to the system, vibrator is not powered from the clock and requires 3 x AA alkaline batteries – supplied

40CLTFVIB Qty 1+ £ 16.50 each  
MBNAAX4 Spare alkaline AA batteries £ 1.24 per pack of 4

40CLTFVIB

## Clocks – Frequently Asked Questions

### “I travel a lot with my work, which clock would you suggest?”

The Sonic Shaker is easily our most popular travel clock. It is battery powered, has a good vibration and is well designed.

### “Where do I put the vibrator?”

Wherever wakes you up(!) – with mains powered clocks many people find that under the mattress gives enough vibration to wake them; battery units with less vibration would normally be placed inside a pillow case.

### “Would a vibrating watch wake me up as an alarm clock?”

We can't say for sure but probably not. People have found that they get used to the vibration over time and the watches are not as powerful as an alarm clock vibrator.

**Team comment:** A backup memory battery does exactly what it says, it maintains the clock memory in the event of a power failure – it does not maintain the display or power the vibrator.

To help you decide, listen to the alarm clock sounds on our information website – go to [www.connevans.com/sounds](http://www.connevans.com/sounds)

You can listen to the sound of alarm clocks before you order!
