

fmGenie – Communication for life

Connevens have harnessed the power of advanced digital microchip technology to bring you the highest quality multichannel radio system available today. The fmGenie combines innovative features with visual appeal and superb sound quality.

The Connevens fmGenie is an undoubted leader in the application of new sound technology for deaf and hard of hearing people.

Simplicity through technology

The fmGenie has an amazing and unrivalled array of features, all presented in a way that users will understand – simplicity through technology.

You are in control with the fmGenie

The range of features given to the user can be easily set. Taken to the extreme, once the controls are set to the user's requirements, all functions can be locked, leaving simply the on/off button working.

Information at a glance

The fmGenie continuously monitors itself, updates the status display and gives you confidence that all is well.

The Connevens fmGenie is as sophisticated with its features and electronics inside as with its visual looks outside.

Quite simply it is the overall best radio aid system for deaf people currently available.

Information in your hand
