

The following pages show all the individual items which make up fmGenie systems.

It is often easier to choose a full system package – these start on page 27.

The fmGenie system can be used with a neckloop, using the 'T' setting, or with direct input leads or wireless direct input (WDI). There are also packages which include a conference microphone for use in meetings, a system for cochlear implants and a package which can be used for visiting hearing aid users.

There are two main items which form the basis of the fmGenie system.

fmGenie transmitter with integral microphone

The transmitter is the unit which picks up the voice of the lecturer or person talking.

The transmitter has an internal microphone as standard and is supplied with a plug-in aerial; the aerial is only required when the internal microphone is used.

Used with belt pouch and microphone pack

Used with neck harness, aerial and integral microphone

FMG110	fmGenie transmitter	
Qty 1	£ 459.35 each	Qty 2-4 £ 436.38 each
Qty 5-9	£ 424.90 each	Qty 10+ £ 413.41 each

Also available in white at the same cost – please specify 'white case' when ordering and add suffix **W** to the part number.

Available in graphite grey with black flash or white with silver grey flash. A wide range of optional coloured flashes are available – see next page. A 'twiddling stick' adjustment tool is supplied with each transmitter.

Size: 88 x 59 x 25mm approx. Weight 74g. excl. batteries – 2 AA not included.

fmGenie receiver

The receiver is worn by the user.

To 'feed' the sound into a hearing aid you will need either a direct input lead and connection shoes if your hearing aid has a direct input facility or a neck loop and environmental sound microphone for use with the 'T' position on the hearing aid or – if in doubt please consult your hearing aid prescriber.

The fmGenie receiver can be used with a pair of headphones for general listening.

Used with neck loop and environmental mic

Used with direct input 'V' lead

FMG121	fmGenie receiver	
Qty 1	£ 525.12 each	Qty 2-4 £ 498.86 each
Qty 5-9	£ 485.73 each	Qty 10+ £ 472.60 each

Also available in white at the same cost – please specify 'white case' when ordering and add suffix **W** to the part number.

You will need some accessories to go with the receiver – a pair of AA rechargeable batteries plus an fmGenie pouch and possibly a harness to wear the receiver.

A 'twiddling stick' adjustment tool and volume control locking clamp screwdriver is supplied with each fmGenie receiver.

Size: 88 x 59 x 25mm approx. Weight 84g. excl. batteries – 2 AA not inc. Available in graphite grey with black flash or white with silver grey flash. A wide range of optional coloured flashes are available – see next page.
