FMG611

£ 30.08 each

By the way, you only get the case – contents are for illustration only!

## fmGenie Accessories & spares

### fmGenie Personal Soundfield case and amplified speakers

Prompted by requests from customers Connevens have introduced a personal soundfield option for use with an fmGenie receiver.

Individual personal soundfield systems are not widely favoured in the UK, however they are a useful solution in some situations such as for cochlear implantees who have not been reviewed and fitted with a personal radio aid system.

The fmGenie volume control adjusts the speaker volume and can be easily set by the user. The top flap of the case has a velcro fixing. The left of the case accepts an fmGenie belt pouch and the right side has a finger hold strap and access to the speaker on/off switch.

We advise the use of a collar, ear or headworn microphone with the transmitter to reduce the chance of feedback.

Size: 175 x 125 x 80mm case only, 200 x 125 x 80mm inc. fmGenie & pouch. Weight: 119g.  
Weight incl. speakers, fmGenie & pouch: 468g.

■ The powered speakers use a pair of AA alkaline batteries which have a life of roughly 40 hours.

fmGenie Personal Soundfield case and battery powered speaker pair  
FMG681 £ 27.56 each inc. pack of 4 AA alkaline batteries

10 Packs of 4 AA batteries

MBNAAX4X10 £ 7.80 for 40 batteries!
