

Equipment is easily ordered as a system package which includes everything you need plus accessories and spares; the following packages cover the systems that fill most peoples' requirements. Warranty period as indicated.

Once you have picked which system you need, you may want to add extra functions with an 'Add-on' pack – see page 32.

When ordering a system package, all that is necessary from Connevens point of view is to request a QFMG..., it is only necessary to list individual items if your ordering system requires it.

**Should you require help with choosing fmGenie equipment:**  
Please contact Richard Vaughan, Mary Cann or David Evans.

All system packages are available with white genies and white d/i leads – just add the suffix W to quotation number when ordering.
