

SmartLink SX Transmitter

1c

Phonak MicroLink™

The SmartLink SX incorporates a Phonak hearing aid remote control, and a bi-directional Bluetooth link for use with a mobile phone. The highly advanced three phase DSP processing package with Digital SuperZoom², fine-scale noise canceller, and Digital Voice Enhancement all combine to provide the best possible MicroMLxS sound. The Smartlink SX also has the MicroMLxS/MLxS synchronisation facility.

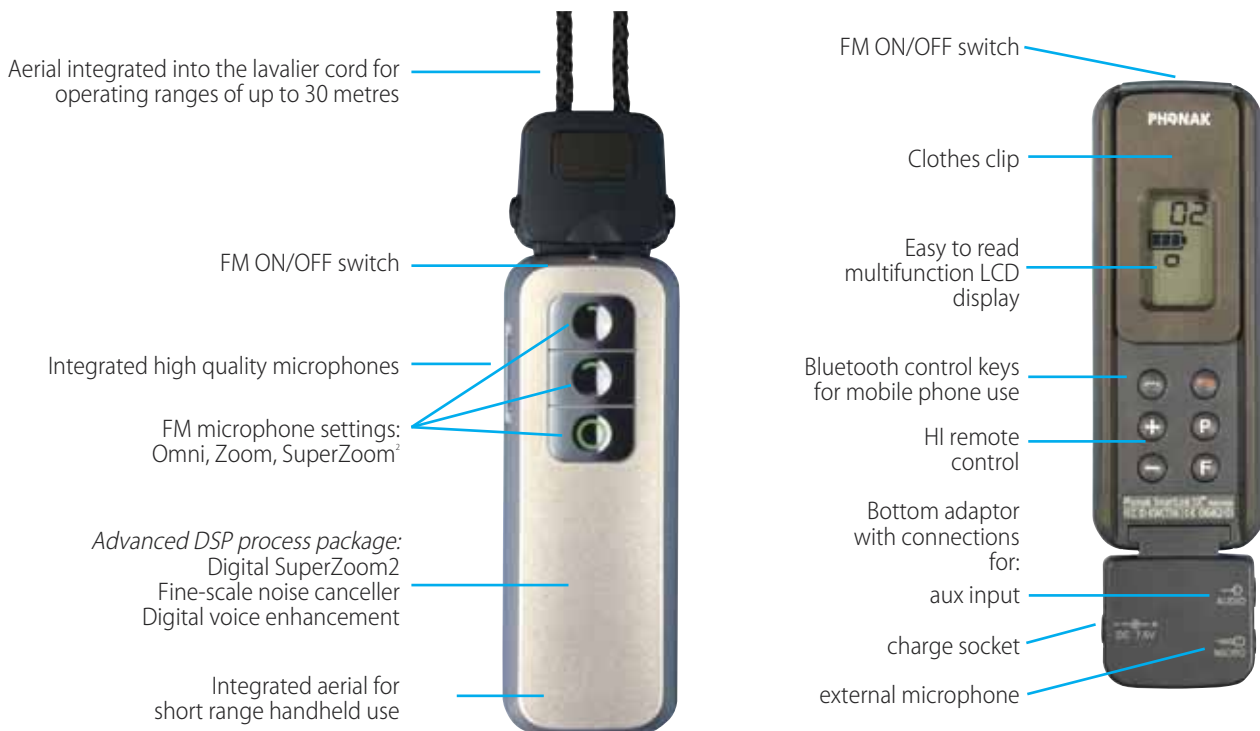

Mobile telephone connection Integrated Bluetooth technology in the SmartLink SX enables a bi-directional digital link between a users' hearing aids and their Bluetooth mobile phone.

Connection to audio sources Any external audio input or external microphone signal can be transmitted via the SmartLink SX transmitter to the hearing aid, simply by attaching to the smart interface adaptor.

Phonak hearing aid remote control The remote control enables discreet control of all the hearing aid's functions – from programme selection and volume control to full fm-control.

The SmartLink SX can be used as a hand held unit. The illustrations below show the SmartLink SX with the alternative lavalier cord & extended range aerial module and its external input & charging modules fitted.

The SmartLink SX has good directionality and sound quality.
